

Here are some recommendations:

- Instead of gmail, use [disroot](#) with [k9](#) and [thunderbird](#) as clients.
- Instead of google search, use [searx](#) (Searx instances), [duckduckgo](#), and [startpage](#).
- Searx instance [FuckOffGoogle.de](#) has the most suggestive name.

You can set any Searx instance as the default search engine on publicly used computers.

- Instead of youtube, use [peertube](#) and invidious (Invidious Instances).
- Also use firefox addon [PeerTubeify](#) to get redirected to peertube if a video is available from there.
- Instead of googleplus, use [diaspora](#).
- Instead of chrome, use Icecat, [Firefox](#), and [tor browser](#).
- Instead of chromeos, use [parabola](#) GNU linux-libre and [linuxmint](#).
- Instead of google calendar, use [nextcloud](#) / owncloud calendar.
- Instead of googledrive, use nextcloud and [syncthing](#).
- Instead of google forms, use [Framaforms](#).
- Instead of doodle, use [Framadate](#).
- Instead of android, use [replicant](#) OS on a Technoethical S3 phone.
FSFE has a good website [freeyourandroid.org](#) about liberating your device.
- Instead of googleplay, use [F-Droid](#).

If you want to reach all apps from Google Play, use [yalp store](#), but be warned that most of the apps there are not free-software.

- Instead of googlemaps, use [openstreetmap](#).
- Instead of google street view, use [mapillary](#).
- For text chat, use [xmmp](#) with disroot account, with pix-art messenger fork of [conversations](#) on mobile and [gajim](#) on desktop.
- For video chat, use [jitsi](#).
- [Framasoft](#) and [disroot](#) offer plenty of other great services.

Finally, spread/share your desire, successes and difficulties (both online and offline) of getting free from Google and GAFAM (Google, Apple, Facebook, Amazon, Microsoft) in general.
